Recall Number and Description: Safety Recall 05S28 – Speed Control Deactivation Switch Fire

What is the issue? Ford cannot be confident that after many years in service, the speed control deactivation switch installed in your vehicle will not leak, posing the risk of an underhood fire. **Until this repair is performed, a fire could occur at any time. A fire can occur even if the key is not in the ignition, and can occur even if the speed control system is never used.** Until your vehicle is repaired, please park your vehicle away from structures to prevent a potential underhood fire from spreading.

What are we asking you to do? Please contact your dealer to schedule an appointment to have this important service procedure completed. If you do not already have a servicing dealer, you can access www.Fordowner.com for dealer addresses, maps, and driving instructions.
The vehicle owner is responsible for having this service action performed. Ford Motor Company may deny reimbursement for any vehicle damage that may result from failure to have this recall performed on a timely basis. Therefore, please have this recall performed as soon as possible.
